Thread: [Csgo league cheat coder *FACEIT* and other league](#)

4yye - December 13, 2020, 9:18 am

Looking for a coder with experience (league cheats)

By starting off this, i do NOT want to see any kind of copy and paste from some other cheat coders words in this thread, I have some experience with coders in the past

Cheating in faceit is not that easy anymore bc of their way of detecting cheats on boot etc. Im searching for a coder with alot of experience who can make me and maybe a friend of mine a faceit proof cheat (in first hand faceit)

Example:

Features:

- Sound esp
- Aimbot (aimlock on mouse button click, need to be able to adjust smoothness etc)
- Radar (Webradar)

Since i know some experienced NAMER coders ive talked to i know their prices, Im doing this post since im not going to pay the prices they have. PM me with your discord or a text about the cheat if you are the one im looking for.

You need to provide me with real proof and if i feel like something is a little bit fishy, im bouncing.

Thanks.

I would prefer a monthly payment to start with. In the long run i would pay a full price, but not as a start off.

LOL I saw your post on epvp.

Let me just say a couple things

- 1) no serious coder will ever contact you, you have to know someone
- 2) you dont set the terms. they do

In all seriousness, what are you expecting to pay, a couple hundred a month.

I can point you in 2 directions, both of which will cost you thousands.

One is software one is hardware. I doubt they would do business with someone who dictates their own terms though.

Who are these experienced NAMER coders you so speak of, don't tell me skadro cuz I'll laugh.

Please drop one big name that you have spoken with.

Also, if you have those connections, why not use them? The cheaper the price tag, the shittier the quality imo especially when it comes to league cheats.

Lul u mention skadro, used to talk to him and bought from him in my first tries in league cheats, Even tho he uses a public driver lmao. Buggy cheat and overall a really bad aimbot.

Ofc i can set terms of what i need? Do you walk into a store and the staff tells you what do buy?
No.

I know a coder that codes hardware cheats with screamer. And the other coder has software that bypasses faceit. I know him and he is legit and has the best aimbot ive ever tested.

AND ik it will be really odd to find a serious coder from a forum, to many scammers.

And thousands, no you can pay 400-600£ for a good hardware/software cheat depends on what features you need. Hardware is obv much safer since its not connected in any way, also unique code so if 1 person gets banned the other users dont.

Obviously not lifetime lmao, Monthly payment

TheCrazyONE - December 13, 2020, 7:27 pm

Dont even waste your time tbh, you'll be banned eventually from faceit, they will always detect cheats.

Not worth it, trust me.

software guy sounds like someone whom i associate with. does his name start with an "n"?

and does the hardware guy you're speaking about start with an "L"?

when it comes to league cheats as I'm sure you're aware, no you do not set the terms.

if they decide it's one time payment, then it's one time payment. its their product and they decide the terms. if you walk into a store you can be denied service lol

Yes sofware "n" and hardware "L"

I meant features i can set terms of what i need, then its up to them if they will cooperate or not.

I mean bud, "N" is one of the most respected coders out there in the EU scene. He's also working on a brand new bypass so I'd definitely say go with him.

"L" as you said is hardware, and I highly doubt it will get UD, especially with everyone being on different firmware.

Are you in "L" discord server? Send me a message, name is d0t.

N only provides aimbot though whereas L provides radar sound esp and is working on the aim as

we speak

LMFAOOOOO coming from someone who probably has NO idea what the fuck they are talking about.

explain to me how software is "safer" than hardware.

with hardware youre not even running anything on your pc, lol its all being ran through a second pc THROUGH a piece of hardware.

when an ac scans your pc, unless you know how to code a driver which i doubt you know anyone that can, you are fucked.

but for you to call people morons just shows uve never even had the chance to use a hardware cheat.

im not even going to argue with you, as i know you dont even have the connections to get such a cheat.

but im glad you showed everyone how uneducated you truly are.

People seem to know everything about cheats in these kinds of forums, lmao

Stop talking when you clearly don't know shit about cheats in the big picture, the only past experience with cheats yuve had is probably a fugging paste from a scam site periodt.

Like 4real? i used to be a noob on these sites and learned som stuff from people writing facts. Now it has become pointless with forums like this since rtrded kids think they know anything.

Well sorry to burst your bubble, I guess again even in valo you're stuck using a shitty public cheat.
Honestly, I feel bad dude.

Fact of the matter is, the cheat I was using is still going strong with its 15 users, not one reported ban yet since beta.
