Sick of shipping costs cutting into your profits?

Maybe you want to start your own service and be the label plug?

My UPS Label method will help you double or even triple your profits.

No need to look for a provider when you can be the provider!

Pricing:

\$100

Only selling 3 copies so method doesn't become saturated.

BTC only.

Terms of service:All sales FINAL. This method works 100%. I've made over 500+ labels.

No reselling of the method or leaking it.

I obtain the right to decline for any reason I deem fit.

Any reviews or a screenshot of the method. You just joined and this is your one and only post. I'm sure I'm not the only one that's skeptical about sending money to you.

Interested if this method is actually 100% legal

Can this be done in Canada?

I have screenshots of completed deliveries. I was creating labels for myself and decided to start a service.

Yes. It does not involve cracked accounts.
