Emails aren't on Google Maps though right? Does it go to the URL and crawls the website for all emails it finds on the URL? Then extracts something from their contact us page eg: help@dogfoodco.com

Some businesses have their email attached to their GMB and some not. It does not crawl to the website.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

It seems like this only scrapes from what you can see on the map.

Do you have a way to import keyword + cities list and automate this instead of it being semi automated?

maybe I have it wrong. But it goes based off what it can see on the map correct?

Can it do pagination?

Hello, is your software still for sale?

xhummus - *November 5, 2021, 8:40 am*

Do I need a proxy for using this service? Also, is it still available?

xhummus - *December 29, 2021, 4:38 am*

Do i need proxy to use it?

If not, google won't block me ?
