Thread: [29 words mnemonic from blockchain.info](#)

SIM-1866423 - December 17, 2020, 7:20 am

Hello i recently found my old wallet from blockchain.info but its fucking weird and 29 words - yes i did count many times-

Wallet from 2015 and got like 1-2 btc left if i remember right. Is there any possible way to recover without email ? Because i did create it when i was teen and don't remember any password for email.

If there is a way i would like to hear, thank you ?

Did you find it ON blockchain or somewhere on your computer?

Siacoin has a 29 word phrase.

This might be of some help:

<https://bitcoin.stackexchange.com/questions/54371/trying-to-recover-a-blockchain-info-wallet-from-2013-w-a-29-or-13-word-phras>

Process seems a bit cumbersome but should at least get you started.

<https://login.blockchain.com/wallet/forgot-password?guid=>

Input it here -you will get it back

Congratulations !

If he recovers it. :)

I bet so many people have lost BTC over the years from poor record keeping.

(Dec 17, 2020 06:14 PM)Focus Broken Wrote: [\[CITE\]](#) Even if the user were a responsible record keeper, blockchain.com's pile of shit wallet sets a newbie user to Bitcoin up for certain failure because they don't display the seed at the time of wallet creation. You have to dig through the settings to find it. Any decent wallet will force the user to physically write down the seed upon creation of the wallet (apps will even disable the clipboard/screenshot function for this) and input pieces of it to ensure the user recorded it correctly.

I can't even find it in settings.

I probably have around half a bitcoin lost from poor record keeping. I'll scrounge around this weekend as definitely have some Post from an HF tutorial I did on an Electrum and a green address wallet.

Sadly no, unless you have a backup in form of 'wallet.aes.json', private key, or seed.

'wallet.aes.json' is also a hit or a miss, or atleast was in my case. I couldn't recover one of my wallets using that, but fortunately I had access to my old email account and was able to recover my wallet thru email.

Did you try inputting your seed in the blockchain legacy wallet recovery tool some guy above linked? Any luck so far?
