Thread: [BEST WAY TO RECOVER YOU DATA FROM SD CARD](#)

SOFTY - December 19, 2020, 1:45 pm

Hello guys!

I've been searching for sd card recovery tools and still haven't found a tool that will help me out.

A little bit about situation that happened...

So I have broke my phones screen (phone also had additional sd card inside),
so I had to put this card to my other working phone and what happened.

I did a misstake by pressing fragment disk and simply my all files gone, I have tested various tools
to recover my data , that was on this card but for
this time no luck for me.

So can someone help me and maybe you have some ideas for that or something...

Regards,

Tigri - December 19, 2020, 3:36 pm

You should try out EaseUS it worked for me

shakur123 - December 19, 2020, 4:13 pm

Do u need a special file in it or just recover the whole thing?

Thanks!

I will try this one!
