Back in 2017-18, I played a lot in NA and Garena servers. Since my laptop was low-end, I couldn't continue playing that game. Then I stopped playing it. I need to start over again.

SkillCapped on YT is really good with making regular videos and keeping up with patches and jungle trends.

DongHuap is also a good youtuber who goes in-depth about certain "onetricks" or meta trends as well.
