Same as the guy above.

3 days ago i bought \$60 in bitcoin from your site.I recieved process email.Then a second confirmation email.

Then nothing else.

No bitcoin in my wallet..?

*I have all of the screenshots and paypal reicept.proofs of doing buisness with your web site.
The service obviously is not automated.

Can you please take the time to square away myself and your other customer who paid for your service but has not yet to receive anything in return.

Thank you
