Thread: [Is GRT going to be sustainable?](#)

VEESZAC - December 20, 2020, 10:16 am

Do you guys think GRT has potential hold profits or is it just getting pumped because CB just added it? Not giving or looking for advice on buy/sell just wondering if what you personally think of GRT, and if it's just in a pump and dump scheme right now.

It's just been pumping up like crazy for the past couple of days, let's see how far it goes.

Sudsy - December 20, 2020, 11:22 am

Not saying my opinion has any weight to it, but I've never heard of it.

QU?CKSILVER - December 20, 2020, 12:05 pm

Somebody create a coin named shit coin please

Doktor - December 20, 2020, 2:57 pm

Nah. 10 bil supply. Great to short. Watch out for occasional pumps.

I feel like it's a distraction to get your investment's away from BTC/ETH/XRP.

Yin Yang - December 21, 2020, 5:26 am

I don't think so- it's def gonna correct soon.

Coinbase and Binance added it because they are early investors. They got the coin at insane prices and will dump insanely hard after their vesting ends.

Meanwhile ride but i think its already overvalued.
