Please don't listen to this baboon.

X22 is a good public provider yes, don't know why this kid would say you'd be banned within 3 months but anyways he's retarded.

Xmodus has been UD since it's release

HoneyHacks UD since release

SC(system cheats) UD since release.

i personally use xmodus as it's one of the best aimbots ive used and the prediction is amazing.

Except the fact HoneyHacks has been detected and got tons of people banned due to timescale.

ArtificialAiming is really good, support isn't the best if you don't use the forum searches and try to find answers yourself.

If you try to fix things yourself and then asks support, you almost always get great answers and the community is great as well.

ArtificialAiming is probably the best and cheapest Cheat+Spoofers you can get for any COD game, and they've been UD on cold war and modern warfare since day 1 of modern warfare beta last year.

Not sure if you're still interested but I sell a tool to do this for all platforms need a PC, Thumbs and eyes and you can do this haha.

Probably one of the best has to be artificialaiming, support is quite active and the cheat has been undetected for the longest time now.

Nice you can do a google search.

He had some issues in the past when he was making a faceit/esea cheat too my knowledge. I'm pretty sure he fucked off and wasn't able to actually provide anything. In regards to him scamming anyone, I'm not sure.

All I know is I've been using his COD cheat for at least 4-5 months, have a 6K/D in warzone, never been shadow banned or anything.

So the cheat I've been using for 5 months has been a figment of my imagination? the 1000+ people who use his COD cheat are all liars?

Guys, get your lips of my cock already. There's too many colors on it.

Agreed I've been a master package sub for a long time and although some bans happen usually they are after a patch or some major update, so as long as you are diligent and check the forums no bans unless really unlucky.

Nice, you fail to click anything besides the initial link. He's been recognized as a scammer for nearly a decade. It wasn't even VAC UD.
