Thread: [Help I want to crack a license cheat software](#)

NeonHF - December 22, 2020, 6:25 am

Can someone help me with it? You can private message me. I'm a new to cracking softwares / programs.

Smexy - December 22, 2020, 6:31 am

You will have to learn reverse engineering, which is really hard.

If you are new to this, don't even try.

Making your own hacks is easier then dissassembling a paid cheat.

They protect it harder then you can imagine, maybe even make it impossible.

If everyone could do it, no one would buy cheats anymore.

edit: paid cheats are really like a job to those people, illegal or not.

Yeah but I could use the cheat reversing the date on my computer. So I don't think it is a secured cheat that's why.

if this works, make a hook of GetSystemTime, return the date you want, then bam cheat cracked without even patching the DLL

Well.. the hardest part is just getting the software itself most of the time. That and figuring out where to patch it so you can run it.

/shrug

If you did, I didn't see it lmao. I don't either, but I have looked in some. Some programs are just.. easier than others. Tho cheats kinda try to keep it on the down low. TBH, just skidding a cheat and changing some stuff is usually better if it's for FPS games cause then they won't be detected as easily.
