Thread: [What are your top 5 DeFi Coins for 2021?](#)

Netflix - December 25, 2020, 3:04 pm

The bullrun seems to be here and there's a lot of hype around DeFi Coins right now. Besides Bitcoin and Ethereum, and other projects, What are your top coins on the DeFi sector? Comment below why.

MY TOP DEFI COINS ARE:

- 1) CHAINLINK- Oracle, built on Ethereum, and it is the top DeFi coin in the market.
- 2) UNISWAP - It is the #1 Decentralized exchange, working project with a lot of hype.
- 3) 0X (ZRX) - Platform to build decentralized exchanges / Great Team behind it / Added on Coinbase and might be undervalued.
- 4) KNC - Kyber Network is a working decentralized exchange.
- 5) BAND - Oracle, built on Cosmos, Chainlink's #1 competitor
- 6) LOOPRING - Platform to build decentralized exchanges. Same reason I like 0x

As you can tell, I'm really bullish on Decentralized exchanges..
[b]What are your top 5 coins? Please explain why in the comment section below.

If you're bullish on DEX coins check out my moonshot gems:

\$PERP (Perpetual Protocol)
\$LINA (Linear)
\$COFI (CoFix)

All small/micro cap DEX tokens, all backed by some great backers.

Interesting coins, never heard of any of them but will definitely check them out!
Also you don't hold any top ones (non small cap) like Chainlink?

Elegant - December 25, 2020, 3:42 pm

Just waiting for Coinbase to list RSR so I can 100x

Chuan - December 25, 2020, 3:47 pm

I am going to invest some of my money into Chainlink that's for sure and I'm gonna have to do some research about the other coins, 0x seems looks solid too.

Not really, I hold some Yearn but that's it. Not that I don't like them just feel like DeFi is gonna experience some huge pumps this coming year, similar to ICOs in 2017. So when looking for DeFi coins I look for small ones which haven't popped at all yet, how do I pick these coins? Simply look at the investors, if a coin is invested in by big names then I'm willing to trust their judgement as investors.

Obviously \$ALPA, best DeFi/NFT project ?

Chainlink is a solid bet and yeah 0x is one of my favorite coins overall.. I feel like 0x is undervalued OD right now.

Bullish for Perpetual Protocol too

Currently there is a trading competition if anyone is interested

Yin Yang - December 25, 2020, 5:58 pm

I like Aave, KNC, and Synthetix is catching some buzz.

Yeah I'm bullish on DEXs but still haven't read enough about the Derivative markets. Just bought some SNX on this dip but will read more about it..

Thanks!

Yeah I ended up buying Synthetix from \$7-\$10 and I'm up more than 100% on all my positions..

I appreciate the tip!!

???Berlin??? - February 10, 2021, 9:43 pm

Holding \$KAVA and I'm like 2x from my position hope it goes well as BTC stabilize. Stop loss is must as anything can happen

Grimeta - February 11, 2021, 5:39 am

1inch, DeFi aggregator, surprised it's not on the list, goes to show how unknown it is and how much potential it has. :)

UnoOne - February 11, 2021, 7:23 am

The one coin missing in the list is AVAX..bought 10k coins for \$5k in July..Now the value is around half million dollars

and had been delegating since then..earning me around 86 AVAX a month = \$4,400 a month passive income (at today's AVAX price)

1inch is a coin I hold myself but when I made this thread 1inch was very low marketcap and I listed the top 15 coins in marketcap order.

Nice! Kava is a coin that was on my list but I still haven't bought. Will definitely keep an eye on it

That's awesome. Congratulations!!

what's the next AVAX coin??

Do you have any crypto holdings? If so what sector are you bullish in?

That's the thing... I feel like the market still has a lot to move to the upside. The next "AVAX coin" could be in the top page. Crypto Evolves Quickly!

Or you can bet on low market cap coins in a sector you understand. With that strategy, you might want to diversify. (Be cautious with low cap coins) DYOR!

Boy you better add Radix to this list. It's prime.

I will take a look into as well.

I held LINK for a while but swapped it for ETH a while ago. None of the others only Radix.

Good fcking job. How did you find out about AVAX? I googled and they had 3 types or public sales in July but I'm wondering how did you initially find out about the coin? Was it HF, biz, telegram, perhaps some news articles? I wonder how do people like you find really good gems early on. What made you invest into the coin? Did you simply read their whitepaper, got impressed and invested?

I've seen you asking the same type of questions on like 10 different posts. People who get in early to certain investments do so by actually doing research. Seems like you want to do everything other than doing just that. Research.

That's what I do and I browse different platforms and I try to read a lot, that's why I made pretty good calls on coins myself, including 3mil marketcap coins. I'm just wondering how did he manage to get into AVAX gem early on, how did he find it, what made him invest. Perhaps there are some other public platforms to browse on that I don't know yet. Its not like you gonna know completely everything just by googling, sometimes asking and hearing from other people first hand will provide you greater knowledge.

I followed the project from the day the started the project and it took 2 years for them to go for public sale

The public sale for 50 cents .I bought it public sale as i was aware of the progress and road map

BTW,I have also got around 700 AVAX as bounty ,by inloving in community activities like AMA, articles,graphics etc

I was wiping away a tear when I found out radix isn't in the list.

mlkaatif - March 21, 2021, 9:28 am

Mines are 1. Link

2. Uni

3. Ox

4. Kava

5. Band

I listed coins by Marketcap and at the time "Radix" didn't make it to the top 20 DeFi coins.

I will definety check out Radix coin! Thanks

Orchid - March 25, 2021, 4:24 pm

\$MTA seems extremely undervalued currently.

Voxi - March 25, 2021, 6:25 pm

RADIX, RADIX, RADIX, RADIX, RADIX.
