Just want to share this because it looks like a exitscam

this guy:

Is selling this method:

<https://hackforums.net/showthread.php?tid=6126721>

and he's not even the owner of the discord server, all he's selling is a invite to a discord server and this is public on other forum.

anyway this method is also Paypal Fraud:

Quote:PayPal Fraud

With PP fraud rampant in the hacker community we feel it's our duty to take a stand on this one. We will not allow discussion on selling of PayPal accounts, stealing accounts, or verifying accounts with false information. This also applies to services/companies that provide similar accounts such as Stripe, Venmo, Zelle, CashApp, Coinbase, etc. Basically if you're doing something against the TOS of PayPal, you're breaking a rule here.

Interesting. There was a user named Yajat (

Only a day after being banned Kolakilo2 registered his account.
