Thread: [Discord reply bot](#)

Check The Name - December 26, 2020, 12:01 am

I'm looking for a bot that will reply to which ever words I enter for it to respond to from SPECIFIED username accounts. I need this discord bot to not show bot in the title & appear as an actual person typing & show as their typing instead of copying & pasting what I give to it.

So for example if I type the word stfu, the bot will type what ever I've already typed for it to respond with & ppl will see as its typing.

EDIT: List your prices before we meet else where.

Can you tell me how much you'd charge for this first before we meet else where?
