Thread: [sending money from ewhore to several other paypal before sending to main](#)

ccx15 - December 28, 2020, 2:00 am

is it safe if i create several paypal accounts , send money around those accounts before sending to my main paypal

priostos - December 28, 2020, 2:07 am

I can help if u wanna but for any profit

I think you should be fine. This also helps warming up the paypal accounts if you want to use them in the future for holding money. Beware though, this is not reliable at all.

I usually bounce my money instantly so I don't have the risk of my account getting closed with funds in it.
