Thread: [KFC GAMING CONSOLE????](#)

Nyx - December 29, 2020, 4:19 pm

So what are your thoughts on the new KFC Gaming Console?

The one thing I think they have going for them is the fact you can take out your GPU and upgrade with ease.

it also supports 240 HZ and 4k gaming.

Wait, so this is the actual chicken company KFC who's making this lol?

Yeah probably just gonna be an over priced pc with an air fryer in it though. Cool novelty item if you have the cash though.

I wish it was an airfryer, as far as I know, it is only a "warmer" that keeps your food heated at the temperature it was cooked at, but does not actually "cook"

Durandal - December 29, 2020, 4:45 pm

maybe we can cook some chicken on there?

MarvinMalware - December 29, 2020, 5:00 pm

I just saw this the other day and couldn't decide if it was real. The trailer makes it seems it's been released in November but I don't see it for sale anywhere.

However it's on the Cooler Master website and KFC's YouTube channel so who the hell knows it's 2020 nothing would surprise me.

I personally do not believe KFC or CoolerMaster will be releasing this anytime soon.

I do however believe they intend to release it at some point.

Astrogen - December 29, 2020, 5:20 pm

Lol, is that for real bro? Or it'll be an air fryer, haha!

Juoku - December 29, 2020, 5:22 pm

Holy shit this is actually a thing lol

I wonder if this has any chance against PS & Xbox

shakur123 - December 29, 2020, 6:30 pm

Anyone planning to buy this?? post some real footage!!

That's the vibe I got from it to (no pun intended lol :P), would make a really cool novelty item.

I'm sure we'll see a bunch of them listed on eBay for twice what they paid once they're all sold out. Typically how things like these go.

I like the like that was a Finger Clicking Good lol

I am just wondering of it reaches our country :D

Lyrarei - December 29, 2020, 10:10 pm

I wonder who'll actually purchase this, haha.

Vitani's Mate - December 29, 2020, 11:05 pm

A friend was talking about it a couple of days ago.

..... I FUCKING WANT!!!!

Would make for a sick game room item!

My dumb ass would get my keyboard and mouse all greasy trying to eat the food I was keeping

warm everytime I die ??

Goku - December 30, 2020, 3:35 am

I recon that it runs windows?

Looks pretty promising actually haha

ColdCypher - December 30, 2020, 3:36 am

How does this stack up against the PS5

guardian - December 30, 2020, 5:32 am

Wow, did not even know that existed ...

PopBo8 - December 30, 2020, 9:03 am

lol i didnt either, its claiming to be a pretty decent console though we shall see...

Spec wise it's better than any console made since you can remove the GPU and upgrade it whenever.

A + - December 30, 2020, 7:07 pm

I think their marketing team finally snapped

If you get it, please make a thread and review it lol

Wondering how it is compared to the others

That's technically true, an upgradable console market would be awesome, making consoles like PCs so you don't have to buy a brand new one every few years to stay updated

Patented grill in the console are you kidding me.

2xTheTap115 - December 31, 2020, 7:44 am

I think that if someone had told me a few months earlier that a KFC console would be available for sale, I would never take it seriously in my life?

The console itself has very good components and it looks great?

seabassdbast - December 31, 2020, 8:37 am

The most gamer console ever, gonna cop one as soon as it drops.

flavoral - December 31, 2020, 8:42 am

oh nice now i can fry chicken while my console is overheating too

Mr. Atlas - December 31, 2020, 8:50 am

the problem is the price

I'm sure the PC will be 100x too expensive, KFC has too many ambitions, they should have changed the name of the company that manufactures the PC T_T

who wants a chicken PC? bruh

G?df?t?? - December 31, 2020, 9:53 am

I read this recently. This has to be just for press. I can't imagine anyone who would want a gaming console that can reheat their wings when most people have ovens / microwaves. Only thing nice I have to say about this: the specs are actually pretty good and I respect CoolerMaster for that. Not sure how they think this can compete with anything else in the consumer market right now, but hey, power to them... Their chicken's garbage so why not branch off into tech.

Same thing happened with old coke and Pepsi memorabilia

This is basically going to be a console system that's is a pc without the typical OS. I have no idea what OS they will run for their gaming console but who knows yet. I have a hard time seeing this go for less than \$1500 considering it has an i9

KFC is taking over the world on god.
