When do you presume valorant cheats will be up to date?

They are currently being updated by the dev and I do not have an eta. I will be sure to post in my server's announcements when its live. :)

However, we do have another one called Valorant Blue that is currently live.

What is Valorant "Blue"? I don't see it on the website either.

How long has Valorant been UD? And does it include a spoofer?

Also is the site/owner vulnerable to a Riot Cease & Desist?
