Hello everybody

The guide I'm offering will certainly help you to make [BRAND NAME REMOVED] accounts last longer and includes some unknown tips on how to avoid shadowbans and not get reported by people / the API itself - It's always good to have more information than the others.

I was selling this method somewhere else and decided to expand here.

Since I'm a new user I'll be giving 2 vouch copies for free.

I don't really know how things work here so if you want to buy the method / get vouch copies - message me or start a contract.

Price: [\$20]

I accept BTC or ETH

Hey. I'm interested in vouch copy. I don't have a good account here but I have 3 years experience and thousands made in ewhoring. I'll be happy to vouch your method c:

Does your method still work now?

I'm sorry for not updating, the method is patched and doesn't work that well so I won't risk selling it to anybody since it would be useless for them... thanks for the interest though.
