Thread: [CryptShot | Crypto Pump & Dump Bot | Be the first into a pump and profit 300% +](#)

NZT - January 1, 2021, 10:34 am

We've decided to start letting a small amount of people get access to CryptShot.

Obviously it's incredibly powerful and has been creating ridiculous profits for us, so we're not going to be selling it to many, maybe 10-15 MAX.

It operates flawlessly at amazing speeds, whilst being very easy to use.

Thank you for showing interest and we look forward to profiting with you.

Why buy?

? Buys the coin within milliseconds, 10x faster than you could do it manually.

? Giving you the same price of the coin as the admins of BPS (for example) would get.

? 3-5x higher profit margins. The coin would typically pump 400-500%, you wouldn't be able to achieve this full profit margin buying the coin manually, with CryptShot you can, easily.

? Input your settings hours before the pump, such as the amount of BTC to use and your profit % to issue the sell order at.

? Also includes a 'stop loss' setting, where you can enter a safety net in an unlikely event where the pump goes wrong.

? Buying manually has issues with scrolling down, moving the slider all the way and selecting your amount. However with CryptShot, simply just enter the amount of BTC you would like to use beforehand, and it'll use this full amount 100%, without any issues or price change errors you would get manually.

? 100% safe and private, all the details you store are on your end only. This is guaranteed.

? Full support in helping you get set up and providing advice on what profit margins to set etc...

? Protected by license keys / HWID and industry-leading obfuscation, so distribution of the bot is impossible. You can be assured that you'll be amongst the 0.1% getting the coin at its starting price.

? If you want to see incredible profits and take advantage of the P&D's going on in the market at the moment, you've found the right place. If you want to get dumped on by us, then continue on manually buying ?

?

? Price ?

Current price is \$500, however if you come from HF let us know and you will get an exclusive discount.

F.A.Q.

What does this bot do? ?

CryptShot gives you the huge advantage of automatically placing a buy + sell order for the coin signal provided in a P&D group.

How does the benefit over doing it normally? ?

With CryptShot, you enter the pump 3-10x quicker than you would manually. This means that you can get the same prices as the admins, meaning 300-400% more profit than everyone else.

How quick does the bot operate? ?

CryptShot completes both your buy and sell order in less than a second. On average, doing it manually from receiving the signal takes between 6 - 10 seconds. In large volume Pump & Dumps, this difference is HUGE.

How does the bot know how much I want to buy and what price to put the sell order at? ?

Within the program, before you run the bot you can add in what profit % you'd like to take at, as well as the BTC amount to use in the market order.

What if the bot fails? ?

It doesn't. The bot places the total amount of BTC that you have set to use at a market execution buy order, meaning you purchase the coin milliseconds after the signal is given. You will be at the earliest price possible giving you the BEST profit.

So what do I have to do? ?

Simply have the bot program open and enter the coin signal as it comes through and enjoy 3-5x the profits you would do if you did it manually.

How does it connect to my binance??

You will need to enter your binance API key in the settings file. Extra instructions will be provided upon purchase.

Does this mean we get access to your binance? ?

No, absolutely not, the API keys are submitted on your end only and everything you change / add is for you only. We do not see any of this. You are 100% safe. When you set API keys on Binance you can choose the exact permissions you grant - for this bot all you need is trade permissions. You do not need to grant deposit/withdraw permissions etc.

How do I purchase? ?

Please see above or get in touch.

? Vouches ?

This will be useful for some people, but how often do these pumps actually happen?

With the BTC price reaching new all-time highs on a near daily basis at the moment, the P&D scene is extremely active - rarely has there been such a good time to buy in.

The next extremely large pump (c.25k people participating) will be in just over 24 hours time (I have copied details down below). If you want a link into the well-known group (BPS), I can provide that over PM too.

Make sure you are well equipped before tomorrow's pump, have got the bot & practiced with it, and can then make your money back (& much more) in one night alone! ?

Next pump will be in 1 day 3 hours 40 minutes 10 seconds

If everybody place sell order at different price it can happen that you dont get filled at your price. If

i put that I want sell at 200% and many people from the P&D group set sell at 100% my sell wont be filled.

Edit:

This P&D group admins are basically using other peoples funds to pump coins forthemselves, they buy first and then give signals to 200k members and they sell quickly.

If your bot give us speed advatage above other people in that group then its whorth it, yes.

Yes this is true. I recommend to customers that they look at the pump group's track record & see what they have achieved recently. Based off this track record, set a take profit price at a level that is likely to be filled.

For example, this recent pump was 500% or so, as you can see pictured below. You could pretty confidently set a 400% take profit level & get filled.

if it's ridiculous profits (400-500% profit per coin) wouldn't you make so much money that these slot prices would be basically nothing? Why sell for a mere \$250 when you're banking in insane amounts?

Not with most pumps. BPS is pumping today with 200,000 members, with that amount of volume any prepump wouldn't have that much of an effect anyway.

dontaskmewhy22 - January 2, 2021, 5:48 am

Pricing is outrageous! '

It's literally an api request, this shit is literally public asf.

Anyone buying this is stupid, go to any coder and tell him to make a tool to buy with api requests by simply putting in a coin.

This is so cringe.

Yeah the last BPS pump was a bit fishy, lots of evidence of a pre-pump and then dumping far too early...

This bot can be used on any P&D group that pumps on binance (CryptoFamily, Mega Pump, etc.)

ingenious - January 4, 2021, 4:58 pm

Quite interesting.

Does the bot buy in at current market price the moment you run it?

How does the bot decide to sell? Is it at a fixed % of buy price?

Can you show a sample of sell orders?

There are 3 large P&D groups operating in the space at the moment that are running profitable pumps. But just to remind you, we do not officially endorse any of the groups, and you must always be careful, never know when the group owners will pre-pump/dump on everyone from 0.0s. Do your own research carefully. Happy to chat more on this point and share my opinion as to which pumps I go in on.

I mean you could have just used OBS for free, but.. ok.

You will notice that after that pump you are referencing, a small slice of the profits were spent on buying a camtasia license (all for your viewing pleasure!)

(Jan 5, 2021 04:39 PM)PCM69 Wrote: [\[CITE\]](#) Looks interesting but always failed with P&D sadly... As did we, which is why we realized the only way to actually make the huge profits from these P&D's is from using a bot. CryptShot makes your buy + sell order within milliseconds, as opposed to people doing it manually which takes roughly 5secs+. You are at a huge advantage using this, especially during the current market!

Been in the P&D schemes for too many years. Like 7-8 years if I have to say that and have tried many many bots that do the exact same thing that this bot does. Not trying to trash the bot, but if you really think you're gonna win money by using it, then think again. P&D schemes are made to get admins rich and you, donkeys poor. The tool is fast (it uses API, duh) but EVERY P&D group uses prepumps ("oh but the group i'm in is not..." - BS! Every group sooner or later will fck you over and over.)

My suggestion is, if you're into P&D groups, knowing that the chances to lose money are still higher than winning, but less than without the bot, then go for it, buy it.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

The main issues with those donkeys your referring to is that they wait too long to sell. If you're using this bot you should simply sell for a profit of 50% - 100% and be (very) happy with that. Waiting for

400% is incredibly risky, especially with prepumps. But yeah the admins will definitely make the biggest gains and will scrw you over the first opportunity they get! That doesn't mean you can't make some money along with them for some time. Like you said, it was worth 7-8 years of your time ;-)
Nonetheless, this method of making money is very risky and you shouldn't invest a few thousand cz you could lose pretty much all of it.

Following the thread and waiting for more HF vouchers (given the open dispute).
