Thread: [Bigo Live Mod Diamonds \[100,000 - 1,000,000\]](#)

King tut - January 1, 2021, 11:54 pm

Hey there ?

As you can see its possible that I'm newbie here and this is my first post, but in real life I'm not believe me ?

I'm not sure if this forums are alive or not! but I'm going to give it a chance anyway ... Also I've seen a few threads with similar topics! Well, Trust me .. This is not one of them

To make this short, I'm a normal business man who spent nearly about \$80,000 USD in that app for the last 2 months ... Yeah! true ? and I'm not planning to spend that huge amount again for the next few months! So....

The deal is ...

1- I give you my Bigo Live ID

2- You do your magic and fill it with diamonds [100,000 - 1,000,000] depend (how it works)! - REAL DIAMONDS NOT FAKE!

3- I pay you \$200 USD CASH (through Ppl) OR (BTC) - As soon as I check my account and confirm the method has been done.

Everyone are happy ? End of deal.

.
. .
. .
. .

So, I'm looking for a serious deal to make with a (Real warrior) in this filed ... NOT looking for amateurs or youth trainee (No offense).

IF you are a Real warrior and would like to give it a try! PM me and I will gladly reply... and if you are NOT, thanks anyway for your time and stopping by.

Important Notes...

- There are backdoors already on the subjected app, I've seen someone mess up with hosts administrators list and Live titles (Which suppose to be secured).

- The Diamonds I'm looking for must be Real NOT Fake! As long as I'm not planning to ruin or cause any issues to hosts rewards or payments (This is Important).

- IF the method works fine! This deal can be done over and over (if you wish to).

- This deal will be done top secretly (I'm not going to ask.. How its done OR Who did it).

Thank you'll for stopping by
Have a great new year

Bigo live is a pile of shit app. What your asking for is hilariously retarded. Thanks for making me laugh.

If you're paying \$200 USD then just spend that on your app... problem solved.

I'm not sure what the point of this thread even was.

Finally :) issue has been solved, and this thread is Ended.

Thanks to the real warrior: Ch*****ves
