Thread: [Twitter Accounts Notifications ??](#)

SA777OSHI - January 3, 2021, 11:11 pm

Sorry for the title and for this Thread overall, not sure if its crypto related enough to even post it but: Anyone knows if there are accounts on twitter that post useful stuff related to Crypto?

Recently Ive been following PS5 Restock twitter accounts with the notifications on, and they are a blessing, I turn the volume all the way up at night before I go to bed and sometimes the notifications wake me up to see some important tweet (thats how Ive bought PS5s in the early morning lol) so I wonder if there are accounts that post useful stuff about crypto?

With Ethereum price going crazy Ive been checking my phone every 5 minutes to see if its a good time to sell (in case it drops drastically or in case its perfect time to make some profit), I'm new to this and on Coinbase I dont see the option to receive that kind of notifications, also Ive been checking this section which is super helpful but it takes me some time to check it and by the time I get here to see some important posts it might be late, hopefully Im not making this too confusing.

Any advice is appreciated ?

I recommend this one

<https://twitter.com/EthGasPrice>

It's a bot giving updates on eth gas fees. With fees getting crazy right now, it's useful to know when fees are the lowest

if you have android download bitcoin checker. they just redid it and a new version came out a few months ago.

<https://play.google.com/store/apps/details?id=com.aneonex.bitcoinchecker>
