Thread: [Pulling the trigger on ETH need iphone wallet suggestions](#)

I'm pulling the trigger and buying some ETH around \$500. Can anyone recommend me a good wallet for iphone users.

No Exchange wallet
No KYC wallets
Must be able to adjust fee

Thanks to anyone who helps

I just downloaded exodus but it won't allow me to change fee's unless it's fixed

You can't. Custom Gas prices for ETH aren't available yet.
