Thread: [Working with Google Sheets API to display a progress bar](#)

Camf ? - January 6, 2021, 12:53 pm

Hey, I am building out a web app for a client's FBA business. I need to build out functionality that ads numbers from a google sheet and displays them via a progress bar.

Is this possible with google sheet API's - [warn]

Let me know if you need more info ?
