I have spotify streaming bot that plays songs using premium accounts. Let me know if there is money to be made with it

Hey man, I honestly don't know. The method I use does not utilize bots or anything of the sort haha.

OP's method is actually not his, but taken from someone else:

Method:

Code Requirement:

A spotify playlist with at least 400 followers

Easy to have, create playlist named after trending artists, import their latest album into the playlist and share it on forum or chats, then when you have enough followers, add other songs and rename it to Summer Vibes or shit like that

Easier way -> buy spotify followers (cheap af)

TIPS: tiktok songs playlist, it's easy to get followers with those

A brain

When you have more than 400 followers , go to : <https://playlistpush.com>

Click on : I own playlists

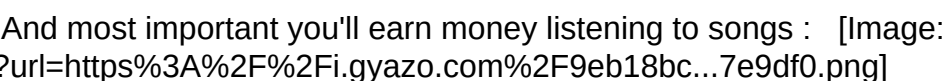

then click on : Become a curator

Select your number of followers (MUST BE ABOVE 400 TO WORK)

REMEMBER, THE MORE FOLLOWERS YOU HAVE THE MORE YOU'LL GET PAID !

Then connect your Spotify

-->And you'll be able to add independent music to your playlist, for which you'll earn money through the site

And most important you'll earn money listening to songs : [Image:
?url=https%3A%2F%2Fi.gyazo.com%2F9eb18bc...7e9df0.png]

So if you have a lot of followers and qualify for \$12 per song, you can earn easily \$200/day but if you have 400 followers it would be more \$200/week

I put time and effort in this method SO PLEASE DONT LEECH

Wow I did not realize. I was given this method by another member on this forum. I will no longer be giving out copies.
