Thread: [.json decryption](#)

HarryCC - January 10, 2021, 6:11 am

I have a .json file that has text I want to view.

Is there anyway of decrypting this text or can anyone offer any advice?

Code a.tmp.ninja/DTjNcpnpA73l.json - download json

Code paste bin / yv7CGFEC - pastebin text

I can't paste the code here because it comes up as weird characters. I can attempt below. Can this be opened?

Katas - January 10, 2021, 7:27 am

It's very easy to decrypt.

Just reverse the key on the top.

Just reverse the key on the top.

Please you please advise how or try?

Thank you.

The download link is in the OP

Katas - January 10, 2021, 8:12 am

It redirects me to Google with his results...

I can't open it.
