Thread: [Convo Suggestion: Add stocks to the existing crypto "/price" command](#)

Cooligan - January 10, 2021, 7:41 am

Recently a command was added to Convos to check the current price of available cryptos and the feature has been very well received by the community so far and it works flawlessly as far as I've seen.

Current command example

Command: /price <crypto>

Example: /price btc

Which will return an automated message that looks like this:

Spoiler [\(Click to View\)](#)

My suggestion is to add stocks as well to the existing crypto price checking command.

Example:

/price tsla

Which would return the same type of message, only with that stocks information instead, like this:

Spoiler [\(Click to View\)](#)

Would be awesome to have this feature and I can see it being heavily used.

Side suggestion: You may want to add an option under the "/hide" command for "/hide price" so if people don't wish to see multiple people using the command, they don't have to.

I support the idea.

Good idea! I'm following few stocks myself and I think such option would be a good addition to the convo.

Agree it sounds nice ?

SIM-353284 - January 10, 2021, 12:41 pm

I approve of this suggestion, thanks cooligan!

Ghouls - January 10, 2021, 1:31 pm

Great suggestions!

I hope they will add them in. ?

Kill Joy - January 12, 2021, 10:41 am

There could be conflicts so needs to be “/ \$” for stocks
