Thread: [Penny Cryptos - who you betting on?](#)

flyingduck - January 14, 2021, 6:32 am

hey everyone,

recently i found out that i've should have invested on FOX token 3 months ago. Wanted to buy 100\$ worth and now it turned 75k% ROI.

I decided to go on a spree today and buy some penny cryptos. I focus mostly on the tech, usability and scarcity.

Now i'm interested what you guys are buying.

cheers

Penny Cryptos? Is this like Penny Stocks or how does it work, because honestly, I have never heard about this before.

Juoku - January 14, 2021, 6:34 am

I'm basically in Nano, Xrp, Atom and Nebl, that's what I got money in atm but it's a good idea to invest in some penny cryptos, just remember those have a higher chance at flopping causing you to lose your money

exactly. <https://coinmarketcap.com/all/views/all/>

just filter price up and you see cryptos for a fraction of a cent. It's definitely a gamble like penny stock but i'm not looking to spend more than 100\$ per coin.

If I had to guess this might be the year for weed penny stocks. Chance it'll pass through the senate in the next 2 years. The house as already passed a bill legalizing.

This is a resource you can try, it show what richer people are betting on CEO, COOs ect since they have to publicly disclose trades.

Currently i'm looking a lot into defi-penny cryptos. i'm sure this will replace banks as we know very soon.

i like the name of the coin :P but it's not a penny crypto per definition.

But i'll definitely look into it.

Lmfao, "If I had to guess" you're about 3 weeks too late on the weed Itachi. However, it will climb a lot from here still. As for penny cryptos, I just throw a small amount in each one in the hopes that it will do exactly what you said. High probability of at least one catching traction in 2021.

interesting. what do you have in your portfolio rn?

SA777OSHI - January 14, 2021, 11:35 am

Personally I invested a small amount on Cardano (ADA), I have faith on that one and I think it definitely will reach \$1 in the long term

?itcoin - January 14, 2021, 11:54 am

Look at XED, it's \$0.4 but it's an amazing new project, defi and NFT, in the gaming industry I think this will easily 10x-100x.

i'm looking to get into defi coins. i have the feeling that they could be a hard competitor for traditional banks soon.

If you don't look into XDC (from XinFin), you'll definitely look back at these times. Definitely do your own research.

I just put some funds on \$MFT, \$ONE and \$POLs. Thinking of a 3x return if BTC is not much volatile.

Ivex - January 16, 2021, 5:38 am

Do you count BAT as a "penny crypto"? Because I have around \$1000 in BAT. HODLing this for the next 5 years at least hopefully, and adding to the position. I see it (the advertising system Brave uses) being a long term solution to the decreased efficacy of online ads.

Frukt - January 16, 2021, 5:59 am

Penny Crypto? You guys mean alts coins, right?

Crypto coins can all be bought at a fraction of 1, meaning you don't have to own one bitcoin. Therefore I don't think it should be called penny crypto. Just call it dirt-cheap alt coins or low market cap alts.
