Thread: [Hydra Protector 1.0.0.0 \[Help \] - Bypass Defender Cloud.](#)

ghostman78 - January 15, 2021, 9:28 am

Hello !

I'm trying to bypass defender, i did it, But Only If Cloud Protection is Disabled.
I'm Using Codedom, Also i'm obfuscating output with .NET Reactor

Stub :

```
Code static void Main()  
{
```

```
Thread.Sleep(17000); <-- Bypassing Avast With Sleep.
```

```
oha(); <-- Call oha void
```

```
}
```

```
public static void oha()  
{
```

```
fewfewfew(); <-- Startup
```

```
Thread.Sleep(3000); <-- Thread Sleep
```

```
string s1 = "%Str%"; <-- // %Str% Replacing Base64 Here  
Domain.CRDomain.Load(CV.FromBase64String(s1)).EntryP.In("", null);
```

So Where I'm Doing Wrong?

I'm New On Crypters, So I'm Still Learning.

Tried :

+ Change Method

+ Added Junk Code

Still Same, Cloud Detecting, without Cloud, bypasses so nice, also with startup.

Can Somebody Help, Maybe Give Some Ideas, How To Bypass Cloud Protection, Later I Will Share This Crypter Here For [FREE]

?

Cloud is a pain in the @\$\$\$. But if you understand how defender works you can achieve it. Defender is easy to control as long as you have a working uac bypass to gain admin to interact with it.

Stetsed - January 15, 2021, 11:33 am

As the guy above me stated, defender is easy to bypass. With privileges, if you are able to get a UAC bypass you can basically tell defender to go screw itself

Nice Thank you guys alot, i already have UAC Bypass, i didn't know that :D so i am new sry

also updated it and checked on dyncheck , runtime not bypassed : Avast 30 min detected , ESET detected

Bypassed : AVG, Avast, MalwareBytes, 360 total security, Kaspersky, e.t.c

Okay What i need For Avast or ESET, i know that you can bypass Avast with 17 min/sec sleep

but ESET?

??????
