Thread: [Windows 10 FUD UAC Bypass](#)

0x1GEN - January 16, 2021, 7:28 am

Hello, are there any available unpatched UAC Bypasses/privilege escalation exploits? If yes, could someone send source code/method to one. I will be thankful.

Voidlight - January 16, 2021, 8:14 am

Even if there was an undetected UAC bypass, no one would just give it to you for free.

Yes there are and yes they will.

Here is one for free: https://github.com/Mrakovic-ORG/Privilege_Escalation

and for the OP: I will be developing this in C++ and Python too, will update this thread :)

You can send a quick love if you will like it ;)
