What are some smaller torrent sites where I can spread & that don't require invites?

I think that people wouldn't leak torrent trackers they use to spread.

You need to find unsaturated tracker, try to search for "torrents invites" "public trackers" "public torrent websites".

Lists of public and private torrents websites and invites you can find for example on forums specified for torrent invites.

If you want to learn more about torrent spreading you can check my signature.

I used to do this back in 2008. Very old way of spreading. Took the virus checking company's like AVG 6 weeks to pick up on the malware.
