(Jan 27, 2021 07:49 AM)chainsbucks Wrote: [\[CITE\]](#) This dude scammed me and somehow got the Admin of this forum to believe his antics . Buy at your own risk .

You offended me on telegram and tried to crack the builder and get license banned, this is scamming?

I offended huh? you refused to make your crypter functional and I offended you by asking you to fix it ,which you never did cos you had a plan of blocking me ,after all I've made payment and BTC is irreversible(scamming) . If I had got the abilities to crack your builder as you claim ,why will I still be asking for a refund ? Dude Show a proof for that claim.

So, like, do this thing be encrypting things?

I barely see over my half eaten pile of popcorn. Lmao, if this is going to be a long term serious sales crypter, it may be beneficial to nuke this thread and start again.

HMMMMMMMMmmmmmmmmmmmmmm I bought it from you

when are you coming online to check what we discuss?

I am so confused with this cryptography section right now. Who is genuine and who is not?

Has anyone purchased this product who is happy it works, if not is anyone going to get a real vouch copy to test it out.

OP if you built this and want this to sell, run it and it will smash the market. HMU on discord if you want.

I hope this product is genuine

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

!!SCAMMER ALERT!!

Just a stern warning to anyone that is thinking about purchasing this Crypter. This is by far the WORST Crypter and User I have ever dealt with in my 10+ years on HF. I purchased a lifetime license from W1zard/SeriousMysterious as he assured me it will be compatible with Bitrat and Bypass all AV's/Windows defender, I am now at 2 Weeks without a private stub and with the crypter being detected by AV's + Windows Defender. On top of all this the stub is 9-14MB which is extremely retarded and impractical.

W1zard/SeriousMysterious does not reply to any messages and when you get a reply after 2-3 days it will be one word "Hey" without even responding to the issue. He will respond to all new users/potential buyers in a heart beat, however once you send him your BTC you will never hear from him again.

Avoid this shite stain of a programmer he calls himself like the plague. If anyone needs evidence please PM me, I'll be happy to provide you with screenshots I have kept. Screenshots to also follow in this thread, stay tuned.

Cuz i am not online on your timezone it dosent mean i am an scammer what are you talking about i have send you the builder and private key, and its not been "WEEKS" without replies, yeasterday

we was talking in tele, this is sale thread not support but if you keep saying here SCAMMER ALERT without any real reason as also you are breaking hf marketplace rules, keep on mind you want support for the tool talk with me not with comment sectiona, if you do then get your support over here.

I have sent you an message in tele, tell me what is your problem and i will fix it,THIS IS NOT AN HF DEAL, so dont talk post nonless here

Ohhhh sorry mate, I didn't realize you're in a timezone that is 3 days behind. Yeah it's a sales thread but I can't contact you for support because you wont reply - funny how your quick to reply on your sales thread but won't respond to myself and others for support after you've been paid.

Yeah you sent my builder and private keys which I tested immediately and it's detected by AV's and windows defender.

You say you're not a scammer, but put your self in my shoes for a second - You won't respond to people that require help, I have paid decent money for a lifetime license crypter, the crypter isn't FUD, I am now at 2 weeks without a functional crypter....So what did you expect was going to happen?

I know others that are currently using your crypter and are going through the same problem, difference between me and them is I have the balls to speak up and I will make sure other potential buyers won't have to go through this same shite I'm going through.

I Back This Up, This Guy is a Fuckin Ripper. He is Quick to reply when it seems he will get Sales

(which means money), But Does not Reply Satisfactorily after He is Paid and He has got the Money.

He Sold a Lifetime License to this Person, 3 Private Stubs and the Private Stub is detected by Windows Defender.

I will never recommend this Guy or his Shitty Crypter for the below mentioned Reasons:

- 1> Too Complicated to Setup.
- 2> Large File Size: 9MB - 14 MB.
- 3> Does not Bypass SmartScreen as Advertised.
- 4> Detected by Windows Defender. (Tested with Private Stub)
- 5> Bad Customer Service.

I had 4-5 Clients lined up But I will never ever recommend His Crypter or His Service to Anyone. And I Advise the same to other People, Stay Away from this Guy.

DexterGO - April 11, 2021, 10:11 am

Dont buy Verry bad Crypter, fortunately I only lost 15 usd :-)

SeriousMysterious - April 11, 2021, 11:21 am

if have you read the T.O.S if you are new on crypters and do not know what they are do not buy i gave 15\$ license just you can see the shared stub and now you complain cuz dont know properly to put an HQ icon like others. Its not your fault is mine being nice to people who dont deserve shit

you don't want to admit that your encryption is crap

I know very well how it works and that's your problem

Stub 14 mo

full detect

shit shit

and I can show the video

can you also stay polite on Telegram

Thanks

Dude are you actually delusional?? Seriously are you actually thinking straight? How can you say "Its not your fault is mine being nice to people who dont deserve shit" When You have charged me personally (and who knows how many others) \$350EUR (\$415USD) for a Crypter that I haven't been able to use since I purchased it 2 weeks ago due to the fact my private stubs + Shared stub is detected by AVs + Windows defender, yet you refuse to acknowledge or want to resolve this matter.

Honestly man no one wants blood from you, we just want what we have paid for. I'm hoping we can

resolve this like adults but you need to do atleast 2 things 1. Improve your support and reply to people, 2. Honour what you advertise. If you can't follow these simple rules then maybe you shouldn't be behind any software - let alone selling it to the public.
