Thread: [Social Media Marketing Services \[Web Design, SEO, Management etc\]](#)

Voxi - January 17, 2021, 9:31 am

Hello, I'm thinking of offering businesses in my area my Social media marketing services, some of the services I have not done myself and others I feel I can out source, allowing me to spend more time on things I am actually confident on.

List of Services I will be looking for:

Search engine optimization (SEO)

Social media management (Scheduled Posting, Customer Support...)

Web design and development.

If anyone has any other services related to social media which you think I'll be interested in please let me know.

I have purposely left some topics out due to me doing it myself, however, if price is right and your expertise in the area is excellent I may be interested outsourcing.

I've been thinking about doing this for over a year but I didn't have much experience with FB or Google ads then. I'll drop you my contact details so we can speak more.
