Did he show you any proof of this maintenance by the data center? DC's always send out notices days ahead of time of any maintenance. They never just shut servers down without notice.

This kid throws insults just because i refuse to give him RDP with RTX 3080 as test server and he's got 40 rep no business rating i told him more reputable member sure just not him.

I love the fact he's blowing up my inbox with insults so cautious around him.

I love how you twist the narrative in hopes that everyone will believe you.

I asked this dude for a 30 USD server and he kept saying no test/trial because he didn't want to launch a 3080 server which costs him 250 dollars

i told him about 4 times That I only wanted a low tier server but he can't understand english. DM Me for full DM. this dudes sketch

And he closed his own threads to avoid people posting about how he is a scam, just read all of the replies in that thread, most are about him scamming

Also my RTX servers range from 16 core up to 32 cores from 96gb ram to -256gb ram why on earth would i give you something like that and low tier what were you expecting GPU server with 1 core 1gb ram

kid is a joke.

DM ME i'll give you full convo kid throws insults and slander when he can't get his way.
