Thread: [PROXY SHOP SOURCE | BECOME A PROXY RESELLER](#)

XMRFISHY - January 18, 2021, 7:08 am

I'm selling a complete proxy reseller source including a python proxy scraper.

I am including a private source where to buy proxies and resell them over their API, you buy them for 1\$ and reselling them easily for 2\$

Features:

Admin panel

Free proxies included

Paid proxy generator

Unique login system based on tokens

What you need to put the proxy reseller up and running is:

Domain name

Webhosting

Cheapest Linux VPS to crontab the proxy scraper (set it to automatically run every x hours to have live fresh proxies)

I am selling the complete source for 100\$, just because I don't have time to run this kind of business.

With some advertisement on forums, money can be made easily.

[contract=tid]Start Contract[/contract]

Keep in mind this source is well worth over 400\$! That's the amount I paid for it here from a member of HF.

Demo link of the proxy shop:

What's the access token for your demo website?

Also, dedicated private proxies are being sold for \$1 each from various forums.

No point buying low quality scrapped proxies for \$1 from the source you're going to supply.

Honey Singh - January 25, 2021, 11:46 pm

Do you sell proxies in bulk?

Looking for 40-50k proxies with unlimited bandwidth.

Message me with your skype if you have.

You can create a simple token by clicking on registration.

Also the source isn't from some low quality scrapped proxies.
