Thread: [Slightly modify thread notifications](#)

Marketplace - January 18, 2021, 9:07 am

Hello,

I think it would be really great if it says "User 1, User 2 & 2 Others replied to your thread" for example

Instead of getting a message each time somebody replied to a thread

What do you think?

Sounds like a good idea, so if you make a few threads or you got a sales thread and you're off you won't be flooded with tons of notifications but just 1 for posts with multiple usernames.

Exactly.

I've been wanting to do something like that for awhile.

Yes. That would be nice. Also, not all of my notifications pop up. It's kind of like you need to catch it at the right time or they disappear. I end up having to search through New Posts to see threads I posted in.
