Important message for those of you dealing with TOM C.

Profile link: <https://hackforums.net/member.php?action=profile&uid=3372466>

It was a terrible lesson to me dealing with this guy, at first, i was thinking he's a genuine guy, not knowing he's a scammer.

I sent him a contract request, without checking if he accepted the contract, and he cancelled my contract request after receiving money from me for 1 month license of Flow Crypter, and even gone to an extent of infecting my PC with his Crypt and blocking me on HF, so that i wont be able to send him PM further.

You guys can go confirm from our conversation below and take extra precaution while dealing on HF.

Thanks.

Please be very careful with this guy, i just told my friend about this issue, and he told me that this same TOM C. has scammed him early 2020 as well.

Like what account_ stated, your thread should be posted in Marketplace discussions to warn marketplace users and I also suggest making a deal dispute if you believe you were scammed.

Like i said on the post, he cancelled the Contract after receiving my payment for the crypter. So, i cant be able to open a deal dispute. And also, i have posted it in Marketplace as well for people to be aware of the scammer.

Why not just ask him for a refund? I mean, he's trying to offer you a solution but you're not interested in that, so just ask for a refund.

I am looking for a good crypter that they let me verify first and then buy because I have had many problems thanks

Check the last screen. Also Tom declined the contract after received the payment and stop responding after op asked for the money back. But still this is invalid report since the contract was never accepted i guess.
