Hey man, I have some questions

How does a SMTP work? Do I have to buy one separately? Do you recommend one?

Thanks

Aexone ? - February 10, 2021, 1:30 am

Why using your mailer and not another one ?

mic141414 - February 10, 2021, 7:10 am

It does support smtp with username/password doesn't it ? stupid question but i found a mailer with only open smtp so i prefer to ask
thanks

Is it still available or ?????

-PUBG- - June 6, 2021, 8:54 am

Yes it still is so sorry for late reply

faxxgrid - June 6, 2021, 9:05 am

does your mailer require smtp

It does require smtp but we have a smtp checker which you can get a list very easy with.

You just run combos through and get hits, I've used free combos and gotten thousands of returned hits before.

Hey I looking for a way to sent out an email to my email list, I'm pretty new to this, could you give me the requirements that I would have to do for your tool, sorry I tried to message you but I need 10 posts before I can do that.

before I buy, I already have a list. I just need a software that will take an email of mine and a list of mine and send an email from my address to all the addresses on my list. I'm not familiar with servers if you could point me to the knowledge would be much appreciated
