Thread: [Is blackhatrussia.net backdoored/honeypot?](#)

SIM-3833886 - January 19, 2021, 10:01 pm

I downloaded [Zyklon HTTP Botnet v 1.3.0.1](#) and it all seemed really fishy as I had multiple av detections, I have been trying to find another copy of Zyklon with Tor but this so far is the only place. Anyone have any alternative links for Zyklon? Don't worry I promise not to get any Israeli bots.

Found an alternative source but it is not compiled and has no builder.

<https://github.com/runvirus/Zyklon>

You can throw it in the recycle bin man.

Zyklon it's a pain in the ass, but not only. Even if you find a non backdoored version, the cracked panel was not cracked correctly and it's bugged as hell.

3xploit - January 20, 2021, 5:55 am

Why would you even try to use an outdated and cracked botnet in the first place?

campusminger - January 20, 2021, 5:58 am

it's always a bad idea to use an outdated or cracked version

it's usually bugged af or backdoored

I wanted to see its tor capabilities, I found a different version on github where I could take code from. Thanks anyways!

guardian - January 20, 2021, 11:18 am

Outdated versions are never a good idea. One RAT, don't remember the name, used to be super popular back in the days, even had an exploit, which could let someone that was infected get into the attacker's machine that runs the RAT server. Now that's what I call backfiring.

Edit: I think it was DarkComet, not 100% sure.

Yes it was Darkcomet. I'm amazed some people still use it.

C++ - January 20, 2021, 2:37 pm

are you really going to use a VIRUS to create a VIRUS? and you don't know what's inside the code? you can find a lot of botnets in github for educational purposes and you get to change the code

ham_1 - January 21, 2021, 9:20 pm

I remember DarkComet, yeah some people are still using it in 2021!

<https://github.com/runvirus/Zyklon> Send the builder [here](#)

????????

Plastikschlitten - January 22, 2021, 1:31 am

it is trash. Dont ever buy stuff from there or give your information

gucciuser - January 23, 2021, 4:11 pm

Honestly speaking I think it's a pot of honey.
