Thread: [\[\\$100's/Day\] The #1 0-100 Unique Ebay Selling Method](#)

K1. - January 20, 2021, 4:45 am

#WHITEHAT#

Please read the below before reaching out

Plain and simple: I'm selling this method because I don't personally have the time anymore to maintain my accounts due to other ventures and life getting in the way in general. However just like all normal people, I still need money and most people like to make money.

So, here we meet.

Transparent: I will be completely clear with those reading this thread as I have no reason to over sell you this product, I'm not here to become a millionaire, just live. Nor will this method make you an overnight millionaire. However, this method is 100% scalable to any degree really, along as you maintain it it will grow itself. My biggest personal account was running at about £4,000 in UK sales a month. This method also allows you to create multiple accounts doing the same thing, the only cap on this is the time you're willing to invest creating the accounts and listings.

Start up Capital: With this method start up cash is not too much of an issue because technically you could start from as low as £30 really but the more you can start with the quicker you can scale up (when I first started this I think I started with around £300 but that was just a personal choice, anything works, I've had friends start with more and some with less.)

Reality Check: This is where I get brutally honest. If you are a lazy person who isn't actually trying to build something that will last and generate themselves a steady legal flow of cash then please just don't bother with this. You will get bored, you will complain, I will get bored of you complaining and then boom. No one has a good day. Those who are genuinely trying to build something and are willing to walk before they run and take their first week slow to get the basics right will prosper and I will not hesitate to offer you my time and advice should you need it!

I don't do "grammar" reviews and as usual will go straight to the point.

Book have 23 pages (OP is still updating some things) and will explain you how to start with ebay and later on go to main thing which you will do.

As I have everything ready for ebay (business account's etc.) will save me a lot of time and final vouch will be faster as I'll start with method tomorrow.

In ebook everything is well explained (including pictures as well) and you won't have problem with start if you don't have paypal or ebay account.

About method, basically you will use "software" which will help you to set up your ebay listings and help you with a lot of boring jobs which you can do manually if you wish, and you'll get thing cheaper and sell them for more money.

So there is no autopilot method you will have to work on it, but it can be much easier with "software" which I'll use to try it out.

As I don't have time left today, tomorrow I'll start method and wait for few sales and then post my final review as I never heard about "software" which is in ebook so have to test if thing is really work and how good it is.

So what you get for 50\$

Ebook which will explain you how to start with ebay (if you don't have account on ebay or paypal)

Main things what you have to care about in ebay business

"Software" which will help you to semi-automatize your ebay business (have to test it out to see how useful it is)

Support of OP if you start struggle with something

Will come back with final review once when I got some results.

So was take for me exactly one day to implement method and it's not that hard, would like to say if you don't have ebay or paypal account will take you a bit longer to get these ones, but as I work with ebay I had everything ready.

So basically you will get info about software which will help you to find product on other page and then you have to put that on ebay, software will automatically do job for you, that's mean that you will get products and all details (how much you will spend in total and how much you will earn at the end).

As this software is not OP software you will have to pay additional 20\$ (at least) to get things running.

I can see a lot of potential for this thing as will help me with my other ebay things which I do, and will save me a lot of time as I don't have to do all this job manually, and also you can get nice products for sale.

Also in his ebook he was cover all the stuff how to use that software, how to work with ebay etc. He is looking for 50\$ and in my opinion is worth if you are in ebay business.

Did I make any money with this?

Yes I do, I put new listings on ebay and connect them with software and everything is work well, there is no issues and it's make life easier if you use ebay for dropshipping.

Proofs?

If you need proofs I can post you pictures from my paypal account, but I have 40-200 ebay transactions daily so...

Will you make money?

Maybe, I mean it's not autopilot method, you still have to put some work into it and you will make sales.

Thanks for giving me vouch copy and GLWS !

Hey man,

Just waiting for these guys to experience the magic in the method and then their will be more descriptive vouches for you to make a decision off!

However, after looking into this same question for another user from France, I do believe this would work over in Italy also!

Have a great day dude!

Interested! Does it work in hk? I havent worked with ebay for a long time! I might need to start a new acc. Will that hinder me making sales? Lets say im willing to do this full time. How much do you think i can earn? From complete scratch!

Also thank you for being transparent and not overselling

Hey dude,

I will have to double check on the ability to do this from HK and I will let you know as soon as possible on that!

Regarding the new account and running this fulltime question:

Starting from a new account: When I first begun doing this myself I started with a brand new account and obviously this can be a 'hinder' on your account at first due to not having the feedback/reputation on the site but this starting period also comes with the slight benefit of not being too busy/stressful but as you build the account and your selling limits increase etc you will find yourself filling orders daily, this starting period gives you nice moment to get into the flow of the process and after that you're just rinsing and repeating!

Running this as a fulltime income: As mentioned in the description of the product there is a benefit to starting this method with a little bit of funding behind you as it will increase the speed which you can expand at, this for me worked the best at the time along side my fulltime job because I would leave for work, do my work, come home and manage my orders/messages/listings etc and I had it all flowing very nicely alongside each other. When first starting out with this method I would definitely NOT recommend hanging up your day job straight away because as I say it will start slow at first so the profits you are seeing will not be anything too crazy to begin but as mentioned in the description this can honestly be scaled to any level really, the results I saw were to the level I was scaling to but it is 100% possible to scale much further with much larger profit margins on the items!

I hope I've answered your questions as best as I can and I hope they help you with making your decision. Remember, I'm not going anywhere anytime soon so there is no rush! Take your time! If you have any further questions or need me to better clarify anything I have said above please do not hesitate to send me a personal message and I will be happy to help you!

Have a great day brother!

If that question was related to my review there is few answers.

I don't want to go into countries where ebay is work where not.

Everyone was once start from zero, so would like to give few suggestion to you and other potential buyers and everyone else.

If you start with new account there will be some limitations which will be removed once when ebay saw that you make good business, as you make more money ebay make more money as well and everyone is happy.

So if you have new accounts start buying cheap chinese products to build your feedback ratings, so basically once when you buy and if you don't get feedback straight away just ask for one, usually buyers doesn't go deep into all feedbacks, but they will trust you more when they see that you already have some nice ratings.

Can this be your full time job?

That can be anyone full time job and no one can give you correct answer if that will be your full time job, as is really depends on you.

Beside ebay I have 2 shopify stores on which I work a lot, and they make me nice money, on ebay things are little bit different as if you promote your ebay listings is better to spent money on your store as at the end of the month ebay will take you 10% of your profit for this month, and if you have your store you'll earn 10% more.

So usually I sell "hot" things on ebay as it have more audience than my stores and for some things is much easier to work on ebay.

For example if you find product which can be hot and if is not saturated and you can have potential 10-30% profit go with this, put listing and find bot/supplier who will boost your listings as this is very important to keep your product on the top.

There is a lot of other small tips, but at all if you put a lot of effort into that you'll be rewarded ;)

Bit more question on the program and the method. So pretty much, i buy another product from another site and sell? Will i lose money when i do that?

Eg. Item A is 1 dollar on other site
Item B is selling for 2 dollars on ebay

I go ahead and buy item A
And item B is not selling on ebay.

Or do I go ahead and post item B first, when i get order then ill place order on item A?

Hey man,

I can't get into all of the details of the method of course but I can assure you that unless there is already money coming in your direction from an order you won't be needing to spend on any items!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
