If you watch porn with techno playing I swear it syncs up every time. Anyone else ever notice this shit....

Only did that once in my whole life haha. It was when I was on vacation with a friend of mine and he decided to just put one on. Had to go to the bathroom, because I was just cracking up.

I just noticed it over and over with each video. It's crazy AF, idk if its the universe or the warped world I live in but its a thing....

I can see how that works out but I personally wouldn't try this, I love music but while doing other things I find it very distracting because I dive into it too much

Pat13nt_Zer0 - January 23, 2021, 7:01 am
I wasn't sitting around and thought "Gee, lets see how techno and porn come together??"
This chick I hang out with from time to time always has techno, edm, ect shit playing so when she put pornhub on i started to notice it...

Koyote - January 23, 2021, 8:16 am

Blockonome - January 23, 2021, 1:01 pm
