Thread: [!! ESCAPE FROM TARKOV !! | ESP | ITEM ESP | NO GRASS | NO SOUND | !! UNDETECTED !!](#)

GroguMando - January 22, 2021, 12:45 pm

Alright, so little heads up after big ban waves that happended last days from BSG.

We are still undetected and no banned users has been reported using our hacks, we changed few things since last few days in our bypass. Latest BSG, and BE logs helped us determine, what they changed in their "detection of EFT paks, textures and etc"

UNDETECTED 04.02.2021

What's up guys ?

Do we have an EFT players ? If so, I am glad to present you our new ESP, ITEM, SCAV, PMC ESP/WALLHACK

Basically it's texture hack, with BYPASS developed by us, it's undetectable by BE, and BSG at the moment, works with latest UPDATE which is 0.12.9.10532

We are updating this every day if needed, we've got currently around 30 players playing on their main account. One thing you should be aware of is manual bans, so that means, don't play obvious, and you should be safe ;)

WILLING TO STREAM ONLINE FOR CUSTOMERS, WITH MY MAIN ACC, TO PROVE THEM IT'S WORKING AND IT'S STABLE

Buyers will recieve lifetime updates, full support (we are online 24/7) , easy install guide and basically everything that he needs to be satisfied :)

[contract=tid]Start Contract[/contract]

GroguMando - January 24, 2021, 10:20 am

UNDETECTED

We decided to limit our slots and make it private due lot of customers using main EOD accounts, so that will make us safier. Also we raised the lifetime price to 80 eur.

BUMP, UNDETECTED 25. JANUARY

GroguMando - January 26, 2021, 1:04 pm
BUMP, still safe to use ;)

John Doe - January 26, 2021, 4:02 pm
Is this just PAK modification?

GroguMando - January 26, 2021, 4:20 pm
it's using texture modifications as a base model along with a bypass, and BE/BSG update checker - which tells you, if they made any changes what could our status hurt

Around 25-30 players at the moment, we took down our discord, to prevent being ratted by reddits garbage rats, so we are taking this kinda seriously, we had reports from our competitors, that they mostly got ratted and sold their cheese to devs/ or rats licking their butts.

We might fill up slots to maximum 50 players, and keep it like that, maybe untill everything will settle out, so our bypass won't be relased or ratted that soon.

EDIT:

We are also thinking about higher pricing due limited slots, and current BSG, BE changes.

GroguMando - February 1, 2021, 5:26 pm
Date 02.02.2021, we relased and pushed new update, which makes our ESP still undetected after 4th big ban wave. Hit me up interested, got everything to prove that's undetected, and will be in future relases.

Gotcha buddy, we had 0 bans since december, updating it on daily basics if needed. Also I can pop up a stream for you, or might get you a contacts to my customers, which most of them are atleast month old.

Just lifetime licenses, that's only safe way to get a real customer, not just little rat.

what guarantees lifetime licenses? from your price that what some people pay for 2/3 month licenses and lifetime ones don't usually last as long.

Just asking for some clarification.

I've had my fair share with different providers

We are running since december, and we are planning to continuite untill our method will be compromised. After that, we will develop a new method to make it undetected again.

Since december there was no detection between any of our customers. Also, we usually check logs from BSG/BE which we have access to, also, we scrap log files from banned users - mostly from our competitors, which helps us a lot.

Ok, at least you're honest on the bans. How long has this product been available? You say it's lifetime access, but I see you have a thread open trying to sell off this business? If you do sell, what's to stop someone like me from buying it and then the new owner wanting to downgrade and ask for more money to for me and other customers keep the hack? Also for the ones that do get banned, are you remedying that in any way? Refunds or anything? Obviously someone that gets to use something like this for 6 months has probably gotten their moneys worth, but someone that gets caught in 3 days is a different story.

If it gets however sold somehow, I have no problem refuding any of my current customers to prevent it getting closed, abandoned. I'd developed this one in late november, with testing and such I relased it around half of december, starting with marketing/promo, in 2021. (late jan).

Understood. And what are you offering to those people that bought your product when you were advertising it was undetected and you just mentioned that there have been some bans from using your cheat? Are they getting refunds, partial refunds? Are they out of luck?

If it gets confirmed that our hack caused user a ban, then of course I am willing to refund user (less than 24 hours)

The reasons is why less than 24 hours is because simply there's a ways which is hard to prove how exactly or what caused a ban like:

- previous installed or left files from another cheating software/.dlls and such related to current game anticheat which is battleye (arma, dayz, etc)
- wrongly installed or followed the instuction for installing (like in some ways you have to properly edit/replace .hosts file for blocking access, and etc)

- not maintaining a proper "service" while using hacks (ex. not keeping any modded files anywhere else on disk, just where it supposed to be, clearing logs, and etc)
- manual tarkov reporting system (mostly efficient when some big streamer, or well know player gets killed and etc - they have their own reporting group/system - even admins responds in current raid while you still in - if not ended)

And such things like this. This is serious business, but you still have to deal with people who never undestand what they are got into. I am fair person, always trying to work problems out, but there's always two sides of any contract/business/sale. Most of cheat providers will never never ever again even reply to someone who had issues with their stuff after payment, but that's not me. As I said I am trying to be fair and work any problems related to sale if possible.

Also, people have to undestand, that cheating/hacking is always something that will get you one time. It's never 100% safe, we can't predict silent updates from developers, noone can. But I can promise you we can regular updates as long the game will be available.

When somehow we are getting detected, I am always prepared to work more than 20 hours daily to keep it updated and make it safe again. With proper testing it might take up to one week, just to make sure customers will be safe.

UP, WORKING AND UPDATED ! :)

(Jun 19, 2021 10:42 AM)conman233 Wrote: [\[CITE\]](#) Hi there, im interested to know if you sell 1 day or 1 week passes?

Hey, sorry for some reason I didn't recieve notification ... we don't sell weekly, or daily passes due privacy and safety of the cheat. Which could be easily broken and reversed by daily/weekly cheap options.

Interested in purchasing. Have not seen a post by anyone in awhile which has me skeptical. Can anyone attest to not getting insta banned?

lita - July 18, 2021, 5:33 pm

Intrigued as well but low traffic on this thread has me cautious.

GroguMando - July 19, 2021, 3:04 am

Most customers from HF has been inactive, that might be the reason. Instead being scared and cautions, you could ask me on discord for my another forum posts, and reviews which are not related to hackforum

GroguMando - July 29, 2021, 6:56 am

UP - Added new colours and variants

Stanley - August 1, 2021, 12:11 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hey currently pushing and working on new update, since BSG keep pushing new updates out, will update the status as soon as I am done.

Thank you for understanding :)

GoldenWonder - January 2, 2022, 7:38 pm

Is this hack still working?

BiggL - January 14, 2022, 1:37 am

New update out, slaying like a beast.. its just too easy.

Dev is super busy all the time making this the best there is.

? gHos? ? - January 14, 2022, 3:11 am

Don't recommend using on your EOD as these paks get detected quite often. If you do use with caution on a base account.

Correct, also I don't recommend EOD's at this time, but there's a bit difference between others "PAKS"

We are not basically paks, but using same glow as paks used to do, we are injecting memory side of the cheat, not the files itself like other cheap providers do.

Regular weekly updates and privacy (now we are selling only monthly and life subs, to avoid

reversers or rats buying cheap keys)

We haven't been hit in last ban waves as usually other cheap providers do, I am using my own developed bypass, which currently no others memory cheat use, atleast nor I know of.

But yeah, it's not worth to use EOD's at this point for cheating.

Thanks biggs !

Do not buy these cheats hes a scammer. I bought for \$100 and played for 5 minutes before being banned. He does not respond and will not give new links with updates. He is a scammer probably selling reused cheats. L

Proof of selling re-used cheats, proof of you getting banned - anyone can claim anything.

Where did you contact me, no messages or anything, if I don't reply make sure you tag me (if discord) and if any other sites, not sure it was real me. No messages here, or anything. (from you)

Please leave your discord or any contact where you are online, I am trying to figure out who are you, when and where did you contact me. I'd be glad to solve your issue, but I can't get in touch with you.
