Thread: [Bitcoin and Ethereum News Updates | Stay up-to-date with Crypto | Automated News](#)

Semmenial - January 23, 2021, 3:00 am

Bitcoin and Ethereum News Updater

I have coded a program to automatically grab the latest news on both BTC and Ethereum and automatically post it on this thread every 6 hours(utilizing the HF API). I hope you guys find this thread helpful, and if you do please, leave a reply below to keep it alive!

How it works:

Every 6 hours my tool will pull the TOP LATEST news articles from hundreds of Crypto News sites, for you to read

My HF API related application will automatically post these news articles in the 'replies' section of this thread.

VATOP(Value at time of Post) will be posted with every post so users can see how the contents of the news articles affects the value of the coin.

If you guys find this helpful, be sure to Subscribe to the thread to stay updated with the latest news pertaining to Bitcoin and ETH.

[size=medium]Having trouble staying updated with the latest Bitcoin news? Well look no further. I've created a program utilizing the HF API to automatically pull the top news from hundreds of Bitcoin news sources every 6 hours, and post the list on this thread. I hope this helps you guys stay updated with the latest in Bitcoin, and make the best out of this tool.

To see the news posts, just look in the posts section of this thread, and you should see new news articles every 6 hours.

I hope you guys enjoy!

I have my sources already but this is a very good idea and i like it, good job, hopefully omni allows this.

So idk feel like the early investor that basically were buy like 1000 and 1000 for like some bit coin for their launch. And to be honest feel like thats wild and feel like eth will turn out to be like bit coin but at a slow level. And soon to be LTC to follow. The really question is who is going to be the next coin and feel like that is where dogecoin comes in.
