Thread: [Workers to do a simple task \(straight payout after\)](#)

btctraderplo2 - January 25, 2021, 8:28 am

Im looking for anyone who wants to make 20usd.

If you are in need of a bit of quick cash then this might help.

What i request is simple:

1. Find popular online software on youtube (Try to be unique)
2. Tell me what the software is and il come up with a download link
3. Find videos relating to the software and download them (Use keepvid or any video saving site)
4. Make a random youtube account and REUPLOAD the video
5. put atleast 20 keywords(tags) in the description(relating to video)

Repeat for 4 videos

Payment will be sent via BTC

This may sound like a long process but it really takes about 10-15 minutes max.

thanks!

Previous reply^^^ ive done it myself mate it takes about 5 mins per video u literally just download someone elses video and just drag it into the youtube upload unique random title and some shit in desc + download link i reckon if u put me on a timer id have it done in even less than 5 minutes...

Im only asking for 4 videos and really if u know what youre doing its not hard at all its the most simple procedure ive ever had to do in my life
^^still cba to do it ?

Yeh im paying 20\$ for that labour if ur efficient and are up to the job ul have it done in 20mins max and therefor the rate of work is

20mins = 20\$

1min = 1\$

I dont think thats a bad price at all??

please message me if u have any interests

it really isnt difficult its not even labour its just a couple of right clicks and sentences..

SIM-82498 - January 25, 2021, 2:09 pm

tbh his task isn't that bad for \$20. easily more than minimum wage for a majority of people, depending on if they know what to do. but again, it's not really hard to do or that long tbh. it really is a 20 min job like OP says.

Perhaps a 20min job for someone who has experience. You're asking users to find popular online software but want them to be unique at the same time.. that's not possible for someone who never done this before. Next you want them to contact you with the video's relating to this unique software. Making a YT account does not take 1 second to create and neither does uploading the video. That depends on length, quality, etc not including the users internet. The keywords would be the easiest task to complete IMO.

I'm trying to help you OP. Explain more and be more realistic. I'll test this and we can see how long this takes me to do, I'll even do it for free. Like I said, I'm trying to help you, not trash you. Contact me through PM if you're interested.

ETH - January 26, 2021, 6:54 am

if it is \$1=1 min I'm down to do

and will take the recording of the whole work and pay for all minute
