Thread: [FB / messenger hack](#)

eIII - January 28, 2021, 1:31 am

I need a person who will allow me to enter another person's FB / mess account. this person cannot lose access to the account and cannot find out about the hack attempt.

this person probably logged in using a phone number I know.
i pay in xmr acc. agreed amounts.

My mail znalezionewsieci@protonmail.com

Johnq - January 31, 2021, 9:54 pm

Oye puedes ayudarme a hackear una cuenta?

eIII - January 31, 2021, 11:20 pm

At the moment I do not need any offers because a trusted member of the forum will undertake the order.

I will let you know about the effects and news about offer topicality of the my annoucements.

Watch out with dealing offsite, i suggest you and the HF member use contracts.

goodluck!

eIII - February 1, 2021, 3:13 am

thank you for the advice. the order was accepted by a high-quality user of HF. I am full of hope for success :)

I will try to inform you about the effects.

best regards

Poor chances, there is probably no one in this forum with the skills to take over the FB account.

Advice for people looking for a similar service.

Be careful, I've only got scam, fabricated screenshots and other crap so far.

If somebody Can do this I'm still waiting but I will pay only after hard proof.

I'm not cheater, I don't have reason to cheat anybody, I found this forum to get service, I have money and time.

eIII - February 9, 2021, 3:53 am

That nobody can do this? xD

privacyPiracy - February 9, 2021, 5:30 am

You should specify what do you exactly want? Hacking a social media account is not a magic task. There are usually three options. Bruteforce the logins, but in 2021 this often requires vast infrastructure to pull of or a very weak password. The second option is using phising, as in baiting the user to log in via a fake but similair site. And the third option is social engineering the victim into downloading malware.

Two of these you can already do alone and are best executed by you, the person who knows the victim. There are premade tools in many Linux distros for these, such as Kali and Parrot.

I have just joined, but looking at the forum more closely I am doubtful you will find what you seek in a post such as that.

In any case, such services if done legitimately often cost from anywhere of 300usd to 1000usd. So if someone is offering to do this for 50usd paypal, alarm bells should ring.

Thanks for the clarification.

It seems to me that sending the victim a malware, some rag or a keylogger on an android phone would be the best solution that would send data to me.

But I don't know anything about it.

I used to have experience with spyphone software but it requires physical access to the device for installation...

ps. the most factual post about social media hacking I have read on this forum ???

Anyone who can make android trojan keylogger for this??

peldon - February 9, 2021, 1:09 pm

If you're successful, please tell me

elll - February 9, 2021, 1:32 pm

(Feb 9, 2021 02:09 PM)peldon Wrote: [\[CITE\]](#) If you're successful, please tell me sure

Im checking interesting things on github and look for something on the dark web. here there are no people willing to modify the Trojan for a specific order.

peldon - February 9, 2021, 2:03 pm

To help, i just have a long list of.....scammers

elll - February 9, 2021, 2:17 pm

(Feb 9, 2021 03:03 PM)peldon Wrote: [\[CITE\]](#) To help, i just have a long list of.....scammers Its True mate, many fu.... Scammers who want to earn without being able to do anything. So reflective... New users buyers be aware!

Like privacyPiracy writed is No magic way to do this. This is complicated and requires choosing the right method.

Thank you.

You can use prebuilt malware with Metasploit. It is very easy to setup, just follow a tutorial on Google. There are plenty.

the problem is the lack of time for research;)

eIII - February 16, 2021, 10:00 am

Anybody who can make fake facebook login page for phishing password and login?

cetnik - April 6, 2021, 10:51 am

Can somebody help me? I would like to see one of my girlfriend messenger talk...

smirnoff - April 6, 2021, 3:12 pm

jam websites, hack social media accounts with cybereazi..gmail
