Thread: [Canvas Student Hack?](#)

Mythicall - January 28, 2021, 5:27 am

Hello I was curious if there was a canvas hack through html or something to bypass the questions and get the answer sheet?

If you can help me out ill send you some bytes

The stuff is server sided. Unless there is a way to submit the test or item and then do it again with the answers

There isn't that sort of access from your end even from a penetration standpoint I think, on Canvas.

What you could do is buy accounts for Che-g-g or Coursehero. Great resources for learning (or cheating) for online classes.

+1 for Che-g-g/coursehero. Just don't use your name and use a VPN because if your school is a bitch they can hire a lawyer and request data on you for posting test questions.
