Thread: [Gmail 2 step verification bypass](#)

minions0898 - January 30, 2021, 11:41 pm

any body have a idea how to Bypass email login verification or 2 step verification

SecBreach - January 30, 2021, 11:43 pm

You cant just "bypass" it. You either phish the target or you're going to need some advanced knowledge to pull it off.

JustHereToBuy - January 31, 2021, 12:03 am

Bypassing 2fa measures is generally a subject all its own. Depending on your circumstance, your options are limited.

Realistically this is going to require a ridiculous amount of effort. Find another way in to the target.

cecinuga - January 31, 2021, 1:06 pm

the 2 factors do not overcome it except with physical flaws on the code, once we thought the ReCaptchaV2 was not exploitable, we were wrong

bobja35 - March 31, 2021, 12:53 am

Sounds dumb but this worked for me a few times from my phone. Login on the gmail app and when it asks you to verify clear the app and turn your WiFi off then go back sign in again using your data and it lets you in

Australia2002 - March 31, 2021, 1:06 am

Interesting topic.

You could try to find flaws that allow you to bypass it though like the person I quoted seems to have done, but not sure if they are even talking about 2FA.

From my experience with Googles solutions, you're probably not going to have much luck bypassing it with the help of their support. Even if you have forged ID docs, they probably wont let you back into your account. (Happened to one of my old Google accounts).

Try to find exploits and flaws in their backend.

Good luck

Teleheist - March 31, 2021, 7:04 am

Yes exploit use this dude he's on Telegram id "xd0150"

what do you mean by clear the app?

Saturn369 - January 30, 2023, 10:21 pm

As a pen tester, the most clear cut way to bypass this is to either social engineer the 2fa from the victim or through a sim swap. The fact that sim swapping is illegal in most places should deter you at least a bit
