Ok so, I just bought the lifetime spoofer and this is my experience:

Owners communication is top notch, He responded to me very quickly and answered all my questions.

The Spoofer itself looks very nice, and has prebuilt options(Combos of the settings) for games. So for example EFT etc.

Highly recommend this if you are looking for a spoofer, it's a real bang for your buck.

You might wanna verify your discord before sharing it, and can you DM me some screenshots and chances of getting banned using this on Tarkov? My discord can be found via the postbit on my profile.

So you can't spoof GPU, Operating system or anything?

Registry spoofing is basically OS spoofing, and it has the shit you need to spoof per anti-cheat, so for example BE, EAC etc

I'm not a staff member on the site but I did buy it, and AFAIK nothing is off and haven't seen anything which is off(Weird internet traffic etc)

opsplayer - March 19, 2021, 8:33 pm

Will this always change my hwid everytime i start it or can it change to one hwid? Some programs i use stick to 1 hwid and i need to change it from time to time n will it stick to 1 changed hwid?

Or better yet like engineowning sticks to 1 hwid but if im banned on my current hwid (the banned hwid) will this change it and then im able to switch my hwid just once?

So i can buy EO again n play with hacks?

Everytime you restart it will set your HWID back to normal. Then you can just change it whenever you feel like it.
