? New Features Alert! ?

We're excited to introduce two powerful updates for PROXYLAB users! ?

? IP Authentication – Authorize your proxies using your IP for easier and more secure access.

? API Link for IP Rotation – Instantly change your proxy IP with a simple API request! Perfect for automation and seamless integration.

? Important: The API Link has a usage limit of 1 request per 5 minutes, as this is a test version. If you need special conditions, please contact our support team. -> <https://proxylab.net>

Upgrade your proxy experience today! ??

? Speed that speaks for itself!

vinzzard - November 28, 2025, 1:04 pm

proxylab.net is excited to announce a special Black Friday promotion for our private proxy services.

From Friday, November 28, to Monday, December 1, 2025, we are offering a significant discount on our monthly private proxy plans.

New Price: \$45.00 per month (originally \$55.00)

A key benefit of this offer is its longevity. Clients who sign up during this promotional period will lock in the \$45/month rate for as long as they continuously renew their service each month.

This is the perfect time to secure high-quality, private proxies at an exceptional long-term price.

Best regards,
The PROXYLAB Team

vinzzard - April 6, 2026, 2:17 pm

Hello,

We are preparing a significant Mobile Proxy update for PROXYLAB. This release is dedicated to ensuring traffic more closely resembles that of a genuine mobile device rather than a proxy, with enhancements across the entire request path, including HTTP headers, TLS behavior, HTTP/2 handling, TCP fingerprinting, routing identity, and DNS consistency. ??

Key updates include:

Enhanced Mobile Persona Consistency: Stronger alignment across headers, transport behavior, and network-level fingerprinting for supported mobile profiles. ?

Refined HTTPS/TLS Behavior: Improved TLS fingerprint alignment and more authentic

handshake behavior for mobile traffic. ? Secure HTTP/2 Isolation: Connection reuse is now managed within isolated buckets to prevent cross-user, cross-route, or cross-modem mixing. ?

Realistic Request Shaping: Stricter control over native identity headers where necessary, while maintaining essential upstream headers and site-specific compatibility. ?

* Improved DNS and Route Coherence: Enhanced consistency between resolver behavior, route identity, and outbound traffic handling. ?

Clients can anticipate higher traffic realism, cleaner session behavior, improved route isolation, and a more stable mobile-like profile overall. Dashboard access will be granted gradually as part of the rollout. ?

vinzzard - July 9, 2026, 3:59 am

? PROXYLAB Update is Live!

We're excited to announce a major update packed with new features and improvements!

? What's New?

? Payments

Direct service purchases are now available on the website.

Faster and more convenient checkout experience.

If you don't see your preferred payment method, please contact our support team.

? Auto-Renewal

Enable automatic renewal to keep your proxies active without interruptions.

? Referral Program

Our referral system is now fully live.

? Proxy Rental

You can now rent proxies for 1, 3, 7, 14, or 30 days, depending on your needs.

Renting and managing proxies is now easier than ever through the updated platform.

? Documentation & API

Comprehensive documentation is now available.

We've also released our API, making it easier to integrate PROXYLAB into your own applications and workflows.

? Bonus Features

Export all your proxies to .TXT or .CSV in 4 different formats.

Bulk update the rotation settings for all your proxies with a single click.

? BETA Notice

All new features are currently in BETA. If you encounter any bugs, errors, or unexpected behavior, please report them to our support team as soon as possible. Your feedback helps us improve the platform.

Thank you for being with PROXYLAB! More updates and new features are already on the way. ?

vinzzard - September 11, 2026, 7:51 am

Service available, you can always try our growing for the next 24 hours, absolutely for free!

Stanley - October 18, 2026, 10:03 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
