Thread: [Escape from Minecraft | Guns | PvP | Custom Loot \(NO MODS REQUIRED\)](#)

Shrooms - February 1, 2021, 8:30 pm

Welcome to

Currently we are in the early stages of development but soon we will be looking for testers, and are currently looking for possible staff positions.

Builders, and Developers are welcome to apply via PM.

On this server the only safe place is spawn, and this is where you want to return to each run. You start with a very basic gun and limited ammo, with no armor. You need to make your way through the map, fighting NPCs (Which carry guns and will kill you fast), fighting bosses that are tanky and hard to kill. There are chests placed throughout the map that may contain loot and if you're extra lucky maybe you'll find a tier 3 chest with amazing loot.

While doing all this and surviving, you must make your way to your exit point within a specific time. If you don't you will instantly be killed and loose all your loot.

Once you make it back to spawn with the loot you have acquired, you can sell your loot, craft some gear, buy some ammo and get right back out there.

Watch your backs though, because it's not just the NPCs trying to kill you it's the players.

This is a basic rundown of the server, but there's much more. Events like airdrops, King of the hill (Holding a location), bounties and a lot more that we plan on adding.

If this interests you let me know below or fire me a PM.

I'll try to keep this post updated for those interested. See you soon!
