Thread: [\[UBER\] Canadian Uber Rides & Eats](#)

20MDM - February 2, 2021, 9:20 pm

If you send me a screenshot of your desired Uber ride or food delivery cart, I'll use my referral credits to place the order. If you request it, I can also make the order in your name if you want.

I'm active all day on [Telegram](#) and Discord to take orders. This method is white hat and I haven't tried it for US order, so I'm just sticking to Canadian orders for the time being.

The cost is 65% of your total ride or food cart but I will be offering your first order for ONLY 50%! Paid by BTC, ETH or PP if you are an Ub3r. I will also discount the rate if you order frequently and provide a discount if you prepay for future orders for a faster transaction. Once the order is placed, you will be able to track it and I will provide support.

Offering two vouch copies if you reach out to me via Telegram.

Hey there,

sent you message on telegram.

Cheers

Update:

Can vouch for my man. He provided an order for 70\$, will definitely be ordering more in the future!

Just ordered \$45 worth of UberEats in Canada. Flawless system he has going. Quick, Easy and saved me money.

Full vouch and will use again.
