Thread: [where you will invest 10k in crypto](#)

SIM-4387328 - February 3, 2021, 4:04 am

If someone give you to invest \$10k in crypto you have to give him 5x return or you will die.
What coin you will choose for this bull run.

Here is my safest pick

ETH - 20% - No comments

ADA - 20% - ADA is already doing well, and I believe in this bull run it will cross its ATH which is 8x approx from now

XLM - 15% - USDC moved to Stellar, so we can see very good growth now

GRT - 10% - Made developers life easy to made new decentralise app. Function as marketplace where anyone can contribute or request information to ensure fees high qualit data and low fetching times. Also its circulating supply trile in just six months. GRT main net has only just released and has already proven its value and utlity. Some oh largest cryptocurrency project already is using. GRT is in perfect position to continue its growth

AAVE - 10% - Top DIFY project for now, Sky is limit for AAVE 10x-15x is very easy for AAVE

VET - 10% - This pandemic show us how broken and out dated our supply chains are and VET show the world how honest and transparent financial incentives can be used to build that better world in blockchain. and one more news is VET competitor IBM is dissolving its blockchain division

BTC - 5% - Safest coin..No doubt we can see 100k but it will only 3x from now. And there is lots of other coin which can give 10-20x

Other coins - 10%

illuminare - February 3, 2021, 5:19 am

I bought a lot of ETH like 1 month ago at \$600 and its sitting \$1550 right now pretty

Other coins - 10%

I agree with most of your picks, I do believe that while VET is a good choice for supply chains, TRAC (OriginTrail) is doing a much better job imo. I believe more in TRAC right now than I have ever believed in VET.

Cosoakh - February 4, 2021, 8:29 pm

My past now tells me to put EVERYTHING on one crypto..))

Just like your political ideology WRONG

CyberError - February 4, 2021, 10:04 pm

i will put

40% on btc to be very safe, preety sure btc will hit 70-100k in new future , that's already almost 3x
40% on ETH, this coin have potential to hit 3-5k in near future and maybe hit 10k when btc reach 80-100k

10% on polkadot :- it's mostly hit and miss

10% on ada :- this coin def will hit 1-2\$, and if things get right can get even little higher

Zoomers - February 4, 2021, 10:27 pm

im waiting for a red day to buy into stuff

user9779 - February 4, 2021, 10:27 pm

i just bought 20k of ethereum yesterday hoping we will see 3k

Cosoakh - February 5, 2021, 12:17 pm

Are you obsessed by me? ?

Show us why I would be more wrong than someone who varies these investments?

You never post in this section, but I do. You're definitely the stalker here bud.

Don't put all your eggs in one basket.

same i think it will peak than correct but who knows it could go more

Cryptic™ - February 5, 2021, 2:45 pm

I'd say look into HBAR and don't hold USDT (Tether), if your gonna hold USD then hold BUSD or USDC

Cosoakh - February 5, 2021, 3:24 pm

Don't put all your eggs in one basket.

When I take a stand, it's time and experience. I don't speak for flood.

What I have to say is relevant because I do not represent any entity or malevolence.

When you expect to multiply your investment in the near future you should reduce your assets as much as possible.

Experience has taught me to push everything into one;

But it can't be suitable for people measuring I respect that I'm not in it.

Same man.

Waiting for it since so long lol

i dont know much about tether and the other various stable coins out there. what's the main difference to holding BUSD/USDC opposed to USDT?

Bruh >.> are you using a translator cause dam

10000days - February 5, 2021, 9:50 pm

I would dump 10k into Cardano (ADA).

Smart contract (goguen) is about to launch this year I believe a lot of erc20 and defi projects will migrate over.

Yanix - February 5, 2021, 11:16 pm

Yeah ADA seems to be more promising... Cardano is up by 58.33% the past 7 days and still going up.

Benzorbentley - February 6, 2021, 6:14 am

Doge for sure will be my choice
